At AGS we stand out from the crowd due to our reputation for excellent service and support of our customers. Established in 1993 AGS is committed to adding value to your business by providing a rapid and reliable delivery of our services to the Australian Printing and Manufacturing industry.

Our business has been built on a solid foundation of customer service. Our sales and technical staff are highly skilled to assist you identify and qualify any of your equipment, consumables or servicing needs.

Our objective is to differentiate ourselves from other distributors by supporting our customers to the best of our ability. We are a long established company who have thrived on the back of giving customers what they need when they need it.

Glenn Maynard
Managing Director

Our Service Commitment

We want to make sure that we provide you with the best level of service possible. Please call our customer service team direct on the following numbers, or use our email or web based ordering system.

SERVICE CALLS:

For service calls phone **1 800 221 410** or **03 9545 1400** ask for Service, you will be asked for some brief details about your inquiry, the call will be logged and you will then be put through to our Technical Services team.

CONSUMABLES ORDERS:

For all consumable orders or inquiries phone **1 800 221 410** or **03 9545 1400** and ask for customer service, alternatively you can email your orders to sales@agsservice.com.au or try our web based ordering system at www.agsservice.com.au

ORDER TRACKING:

If you have a question about an order you are waiting on, call our customer services hot-line on **1 800 221 410**

We're here to help

Office and Warehouse: 38 Geddes Street Mulgrave Vic 3170

Working with professionals

AGS offers you complete peace of mind, providing licensed, guaranteed and fully insured professional service on time every time.

Registered Electrical Contractors

Any company or person in the business of electrical contracting or offering to contract must be registered as an electrical contractor.

AGS are registered electrical contractors and as such are licensed to directly engage in electrical wiring work in those States.

Licensed Electrician's

An un-restricted Electrician's License entitles the holder to carry out all types of electrical installation work without supervision. However, to contract or offer to contract to carry out electrical installation work, a licensed electrician must either be a registered contractor or be employed by a registered electrical contractor.

AGS only employ adequately licensed, qualified trades people and are registered to carry on an electrical contracting business.

Guarantee

In most cases whenever a licensed electrician completes any electrical installation work, they must provide a Certificate of Electrical Safety.

Certificates of electrical safety are only available from qualified electrical workers who are registered or licensed. As such, a Certificate is your guarantee that the work has been done by an appropriately qualified person and complies with all government regulations and that it has been carried out in accordance with the highest standards demanded.

AGS guarantee our workmanship and will issue you with a certificate when ever one is required.

OH&S Accredited

Occupational Health and Safety procedures and policies are the cornerstone of legislative and administrative measures that improve safety in the workplace.

AGS have a comprehensive set of OH&S procedures that minimize the risk of injury or property damage.

Work Cover insurance

Insurance covering employers and workers
AGS maintain a full Work Cover insurance policy, to protect ourselves, our workers and our customer's interests at all times.

Public Liability insurance

Insurance covering legal liability for personal injury or damage to property
AGS maintains multiple Public Liability insurance policies.

Industrial Automation

At AGS our technicians are highly skilled and trained in Industrial Automation.

We are systems integrators for many of the leading technology manufacturers. Whether it be Collaborative Robotics, Safety Guarding to Australian Standards, OH&S compliance or Productivity Efficiencies look no further.

Risk Assessment's are the foundation to guiding you towards a balanced approach to compliance. Your equipment might need to fulfill a variety of compliance requirements and we are able to customise solutions that suit your business needs.

Collaborative Robotics

Maximise your resources and increase productivity by configuring the robot system at will to respond to any production requirement. Our Collaborative Robot's versatility allows it to be assigned to almost any task.

Talk to us about how we can implement this technology into your business

Safety Curtains

Creating A Safer Workplace, Without Compromising On Productivity.

Have you considered how safe is your workplace that uses machines with moving parts?

There's more to safety than simply installing a guard. If properly assessed and implemented, safety can enhance productivity and increase the company's bottom line.

Manufacturing Efficiency

With increasing consumer demands conventional processes may impact efficiencies.

Ask us how we can help to build or retrofit machines that provide increased productivity.

XANTÉ

EnPress

The En/Press Digital Multi-Media Press with the patented Enterprise High Speed Feed System and the new Enterprise-SL Feeder offers users an affordable way to go digital and meet the demand for fast, full-color printing. Enterprise's groundbreaking design features a straight multispeed feed path for a faster and smoother delivery compared to other feed methods. The complete digital solution is powered by iQueue Workflow that offers new file editing options, new variable data manager, advanced color correction tools and more.

X32

The X-32 is a revolutionary advancement in UV printing. It is a heavy-duty, six colour, high speed uv-curable flatbed inkjet printing solution for any large object or irregular surface. Print on small-format coroplast signage, clear acrylic displays, foam board, wooden signs, painted steel signs, aluminium outdoor signs, PVC plastic, stone, magnetic materials, corrugated boxes, plastic containers, counter displays, pens, balls, tags, tiles, and much more at an impressive 720 x 1200 dpi.

Excelagraphix 4800

The Excelagraphix 4800 offers incredible speed and a small footprint at an attractive price point not found in other traditional inkjet technologies. This digital inkjet box printer is powered by Memjet's revolutionary Waterfall Printhead Technology®, employing a stationary print head bar system that allows for single pass print speeds up to 416 corrugated flat sheets of 121.92cm x 60.9cm per hour

Workflow Solutions

iQueue

Xante Workflow solutions are designed to drive professional Digital Color Print Systems, Mono PlateMaking / FilmMaking Systems, Computer-to-Plate and Computer-to-Film Systems. Their advanced features automate complex prepress task, help to eliminate costly errors, increase overall shop production and imaging quality

Faldo print finishing equipment is a manufacturer of paper cutters, glue binders and paper folding machines. The research and development department is located in the UK. All our machines are developed to European standards

Semi Automatic Perfect Binders

- Max. binding thickness: 60mm
- Binding speed: 200-250 books/hour
- Clamping book: automatic
- Clamping cover: automatic
- Adjustable cover clamp
- Glue rollers: 3
- Side glue: yes
- Easy setup
- Robustly build on cabinet
- Weight: 265 kg
- Power: 220V/50Hz, 2.4Kw
- Dimensions: 170X56X99cm

Paper Cutting Guillotines

- Max. cutting width: 520mm
- Max. cutting height: 80mm
- Max. cutting depth: 52cm
- Min. cutting length: 30mm
- Hydraulic cutting, hydraulic pressing
- LCD screen
- Memory: 100 programs/each 12 steps
- Display accuracy: 0,1 mm
- Eject function
- Easy to program
- Cm or inches
- Weight: 400kg
- Power: 230V, 3.4Kw

Stitching Machines

The Model 3 stitching machine, widely used in the postpress - printing and publishing market, has high performance stitching blocks, magazines, notebooks, books and catalogs. Developed in 1950 under a strong and durable project, it's system was built targeting both high-performance and small runs. It is versatile and takes up little space. Easy to operate, applies 200 staples per minute up to 25 mm, equivalent to 250 sheets. For more security, better speed and productivity we indicate the use of Miruna stitching wires.

LEGRA 420 Perfect Binder

New perfect binder for high productivity book binding up to 420mm spine length. It handles soft covers from 70 to 400 gsm and even hard covers (2mm thickness) thanks to the exchangeable coverclamp tool. Powerful spine and side clamps allow perfect result also on uncreased covers making workflow faster and cheaper. The whole working process is customizable thanks to its user friendly software.

MAMO PLASTI 350 XP Laminator

Single or double side automatic laminator with automatic separator ideal for single side cover lamination and encapsulation with films from 25 to 250 microns. Automatic separation will be performed either on single and double side BOPP laminated sheets thanks to the powerful built-in tear-off system. 1000mt BOPP laminating rolls can be installed on top and bottom reel holder. 75mm diameter laminating rolls will grant perfect lamination result even at maximum speed. Inexpensive adjustable temperature of the two laminating rollers will preserve the quality of back print in case of single side lamination. Automatic high pile suction feeder controlled by machine's PLC will adjust feeding speed accordingly to laminating speed in order to keep constant gap or constant overlap between the sheets.

SQ 320 Square Back System

Folding and stitching machine with square back system Booklet maker for a professional and heavy duty use. Can punch and fold up to 30 sheets (70gsm). Its exclusive feeding length of 61 cm will lead to nice and squared A4 landscape booklets. Up to 4 stapling heads can be installed (2 stapling heads are included in the machine). Digital control panel will let you set automatically the paper length and square spine level (5 levels) making this machine user friendly and flexible for any kind of job. Standard staples or loop staples can be used (deactivate the square-back function in this case). Can be operated in manual or automatic mode.

COREL 52 Electrical Creasing Machine

Workable paper thickness 50 gsm max. The creasing machine motor is operated by an electric pedal for master processing. Double table and double stop to execute four creases in a short time. The creaser is equipped with millimeter side rulers adjustable on both sides in order to compensate skewed prints. Heated creasing bar (adjustable on the control panel) will make creasing result on laminated paper even better.

Glunz & Jensen PlateWriter

The PlateWriter™ series is the acclaimed chemistry free range of Ctp Systems from Glunz & Jensen's. The system produces press-ready aluminum plates without the use of chemical processing. Setting new standards in cost flexibility and speed, the PlateWriter™ produces digital CtP plates, which deliver accurate registration and high quality for small to medium format offset printers.

The PlateWriter™ applies a patented Liquid Dot™ image on to non-photosensitive aluminum printing plates. The imaged plates are manually fed through an integrated finishing unit that dries the plates and bonds the liquid dots to the plate surface. The finishing unit includes a built-in gumming station to finish the plates for storage or immediate use on press. The daylight operation and chemistry free approach makes iCtP the ideal low maintenance platemaking solution.

Chemistry-Free Digital System - Grained Anodized Aluminum Plates - Easy-to-use, Compact Design - Simple and Affordable

iCtP 2000 A3
Up to SM 52 Size

- Image Resolution: 1 440 x 1 440 dpi or 2880 x 2880 dpi
- Standard aluminium plate capable of press runs up to 50,000
- Plate Width: Max 549 mm
- Plate Length: 274-610 mm
- Total Plate making time: 8.32 min/GTO 52

iCtP 3600 Pro
Up to A1 Plate Size

- Image Resolution: 1 440 x 1 440 dpi or 2880 x 2880 dpi,
- AM and FM Screening
- Press runs up to 50,000
- Plate Width:
- 210 - 914 mm
- Plate Length:
- 311 - 1140 mm
- Total Plate making time: 2.53 min/GTO 52 SM 74 6.05 min

CRON - ECRM

Thermal

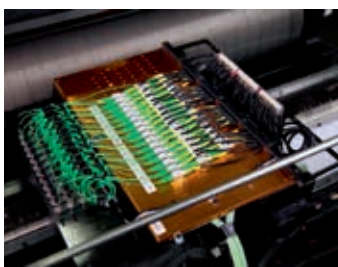

Ultra Violet

Flexo

Welcome to CRON-ECRM, a company that supplies the printing industry with new and innovative pre-press products to achieve the best quality solutions in the marketplace.

Technology Imaging technology that matters

Cron CTP technology is capable of up to 128 laser channel, it has new cooling blocks which give longer life and more stable output. Cron Ctp systems use single-channel Laser Diodes, the benefit is substantially lower replacement costs, and a far lower probability for replacing the complete set.

Stability Unique Drum Technology

Flatness tolerance $\pm 5\mu\text{m}$ - Straightness $\pm 5\mu\text{m}$ - Drum-clamp dynamic balance - Unique Clamp design - Anodised hardening surface treatment - Compartmentalised vacuum control - to suit both large and small plates - Min. plate size of 240X320MM for 4-up CTP (36-series).

Durability Quality beyond expectation

Easy to service - Easy to upgrade - Long lasting
Because of the nature of Cron CTP structure with consistency, stability and quality, the product lifespan can easily surpass other products that require propitiatory parts.

5 Year Warranty Reducing the cost of ownership

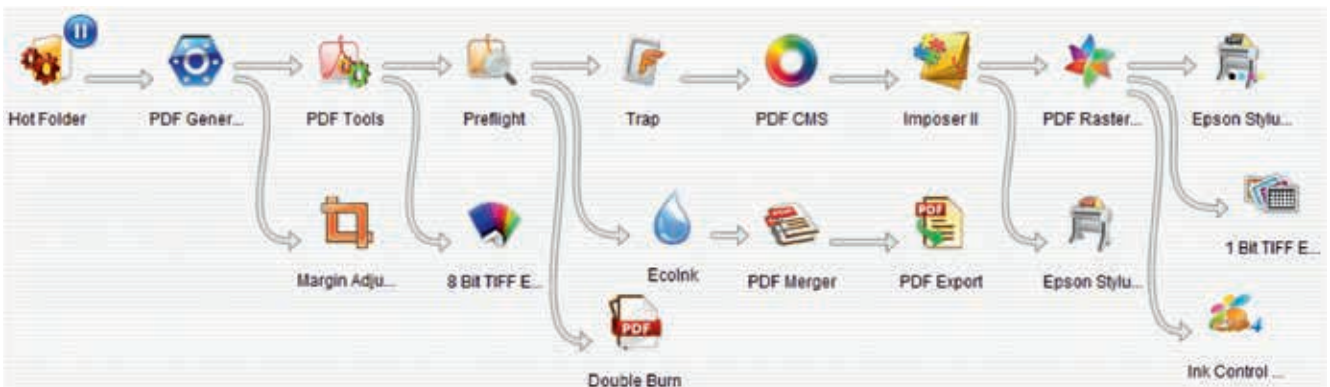

Reduce the cost of ownership and have piece of mind with Cron's guaranteed 5 year parts warranty.

COMPUTER TO PLATE

Founder Workflow

ElecRoc 6 is a fully integrated JDF/PDF pre-press workflow with server/client system structure to achieve more stability and higher processing efficiency. It has many functional modules, user friendly interface, and easy to operate.

Xante Workflow

Xante Workflow solutions are designed to drive professional Digital Color Print Systems, Mono PlateMaking / FilmMaking Systems, Computer-to-Plate and Computer-to-Film Systems.

Their advanced features automate complex prepress task, help to eliminate costly errors, increase overall shop production and imaging quality

Features

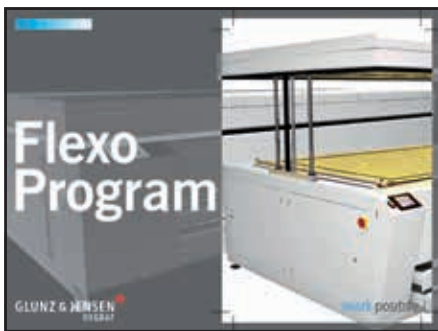

- Sequential Numbering
- Imposed Stack Order Printing
- Full Imposition
- Dead-on Spot Color Matching
- Fully Independent CMYK Controls
- Full-Speed Variable Data
- Over a thousand design templates
- Advanced Barcoding
- QR Code Creation
- Create lines, arches, and virtually any shape
- Multipart Forms Creation
- Multiuser Site License
- Booklet Printing
- Super Accurate Job Cost Estimator

Plate Processors

- Thermal • Violet • Plate Stackers
- Rinse Gum Units • Clean-Out Units

Flexo Plate Processors & Systems

- Exposure Units • Processors (Wash) • Light Finishers
- Dryers • All-in-one Systems

Service and Repairs

AGS offer a full range of servicing options including:

- General maintenance and breakdowns • Annual service contracts • Software upgrades and problem solving
- Spare Parts sales and supply

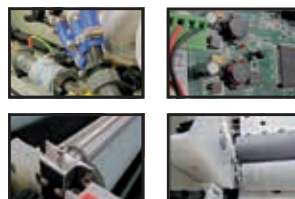

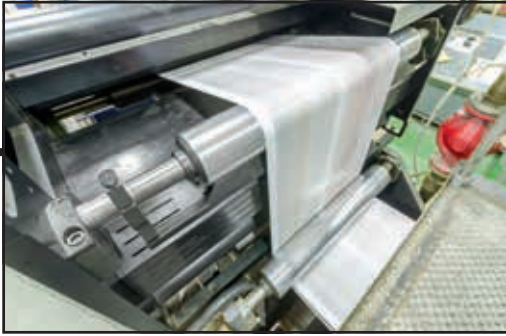

PLATE PROCESSING

ECRM Service Repairs & Sales

AGS offer sales of new and used equipment, as well as a full range of servicing options including:

- General maintenance and breakdowns
- Annual service contracts
- Software upgrades and problem solving
- Spare Parts sales and supply

Sonora - Process Free Thermal Plate

It is Kodak's press ready technology that enables KODAK SONORA Process Free Plates to bypass processing and have the un-imaged plate coating removed as part of the press startup sequence. Press ready technology uses the basic principles, mechanics, and components of lithographic printing to prepare the image on the plate for printing. With SONORA Plates, in almost all cases, a printer's current press setups, sequences, inks, fountain solutions, and blankets can be used successfully. Press ready technology also works with integrated and non-integrated, conventional and continuous dampening systems and for printers with automatic startup sequences. It all happens seamlessly as part of the regular press startup.

Electra Max - Process Heavy Duty Plate

UV, low-energy UV and LED-UV have many benefits for commercial and packaging printers, but it can be challenging to find a plate that stands up to UV's aggressive press chemicals, abrasive stocks and UV inks. KODAK ELECTRA MAX Thermal Plates were designed specifically to deliver long run lengths in UV applications, up to 150,000 impressions unbaked. So printers can get all the benefits of UV without sacrificing plate performance.

FUJIFILM

Superia - Process Free Thermal Plate

Superia is a processless plate that eliminates the processor, chemistry, gum and water used in the conventional plate production process, the plate being taken straight from the platesetter onto the press. This means Superia represents the fastest way of getting a plate on-press, and all the variables associated with processors and finishing units, including the time and labour involved with their maintenance, are eliminated.

Superia - Process Violet Plate

When used with our 'lo-chem' finishing units, no chemical replenisher is required meaning chemistry consumption is considerably reduced. Lower water use and minimal waste. Rated at 1-99% resolution (when used with a Luxel 'HD' capable platesetter), Superia PRO-V brings unmatched quality, consistency and productivity. The elimination of chemical replenishment and the unique formulation of the developer result in a much cleaner bath which equates to a simpler maintenance regime and easier cleaning.

DPX POLYESTER PLATES

Digital Polyester Plates

Polyester Ctp

Polyester-based plates designed specifically for use in DPX platesetters

- 6-inch core, emulsion in (spec 1520)
- Available in .2 Gauge
- Up to 20,000 impressions
- Activator and stabilizer chemicals available

Analogue Polyester and Paper Plates

SilverMaster

Polyester-and paper based plates

- .007 mil plates designed for 2 colour and carbon less printing
- Up to 15,000 impressions
- Activator and stabilizer chemicals available

Analogue Plates & Films

P55 Positive / Alliance Imagesetting films

Plate and Film Chemistry

- PROCESS
- PANTONE
- METALLIC
- INK MIXES
- SEALER

Syner-G EX Process Ink

Syner-G EX is based on an innovative resin/oil combination providing robust lithographic stability and optimum press performance. Syner-G EX is fast in color and shows very low misting on modern high speed press. On most substrates, fast setting and rapid drying work and turn on further processing of the print work (folding, cutting stitching etc.).

Pantone NPS Ink

Excellent lithographic stability at all press speeds, Excellent performance on long perfecting presses, Based on vegetable technology and mineral oil free, Fast absorption and setting, For all fibre-based substrates, Very good stack capability, Very fast work and turn, Good gloss, Very good mechanical resistance.

Top Finish Varnish

TopFinish is an overprint varnish with good overall properties for straight printing. Fast drying leads to a protective film which shows good mechanical resistance over pre-printed inks and over unprinted paper. Prints coated with TopFinish allow a fast work and turn or further processing (cutting, folding, stitching) in the book bindery. Both, the setting time and the mechanical resistance depend strongly on the film thickness of the applied overprint varnish.

Blanket & Roller Wash

AGS PREMIUM WASH

Economical roller cleaner for 26" - 40" sheet fed presses. Water miscible. Suitable for manual or automatic systems. Available in 20L, 205L, 1000L.

AGS AUTOWASH WASH

A non-flammable, blanket and roller wash. Available in 20L, 205L, 1000L.

AGS ENVIRONMENTAL WASH

Mild odour and easy on the skin. Contains no aromatic hydrocarbons. Effective for manual or automatic cleaning with or without water. Suitable for large format sheet fed and single width newspaper presses. Available in 20L, 205L.

AGS QUICK CLEAN

An economical ink remover for metal press parts, knives and back cylinders. Available in 5L, 20L, 205L.

AGS ALCOHOL IPA

ISOPROPANOL 20L, 205L

Solvents

AGS A55

A highly volatile hydrocarbon solvent that performs well in situations requiring a solvent that evaporates quickly with no residue. Available in 20L, 205L.

AGS TURPS

Mineral Turpentine Available in 20L.

AGS ACETONE

Available in 5L.

AGS METHYLATED SPIRITS

Available in 20L.

Plate Cleaners

AGS PLATECLEAN

High quality range of plate cleaners for conventional and Ctp applications. Heavy Duty, Ctp and mild plate cleaners available. Available in 1 L Bottles.

Deglaze & Rejuvenators

AGS BLANKET & ROLLER REJUVENATORS

Rejuvenates and deglazes rollers and blankets. Deep cleans and restores a matte velvety finish without harming the rubber. Available in 5L, 20L.

AGS FARBLOSER DEGLAZE

A universal rubber conditioner and deglazer with low odor. Formulated to thoroughly clean and quickly remove persistent glaze. Available in 1L, 5L.

Chemical Sundries

AGS FOUNTDRY

Water soluble cobalt solution. Used in press ready fountain solution. Available in 1L.

AGS ANTIFOAM

Controls and eliminates foaming in fountain solutions. Available in 250ml

AGS INK CONDITIONER

Soft Paste that releases tack and improves solids and tones.

AGS NUMBERING MACHINE CLEANER

Cleans and lubricates numbering boxes without dismantling. Available in 1L

Fountain Solutions

AGS RED FOUNTAIN SOLUTION

Anti calcium fount with special drying agent.
Available in 5L, 20L.

AGS FOUNTAIN 2400

Alcohol reduction fount for a broad cross section of machines and plate systems.
Available in 5L, 20L.

AGS AQ CLEAR

AQ CLEAR FOUNT is formulated for use on cloth covered dampening systems for presses running up to 8000 impressions per hour and presses equipped with alcohol dampening systems running up to 15,000 IPH. AQ CLEAR FOUNT is strongly buffered and is suitable for hard water up to 100°d hardness.
Available in 5L, 20L.

Anti Marking Films & Papers

The Master anti-marking film and paper is coated with a uniform layer of over 2500 microscopic silicon glass beads per sq/cm.

The ink repellent 170 micron spherical silicon glass prevents ink smearing on the transfer cylinders and ensures that only the smallest possible area is in direct contact with the wet ink during transfer of the printed sheet. This enables the printer to run the press at higher production speed without marking and minimises downtime due to cleaning of ink build-up on the press cylinders.

Bonded to the backing substrate with a hardened polyurethane adhesive both the anti-marking film and paper are resistant to ink, oil, standard press wash-up solvents and water.

AMP: Anti-Marking Paper - Economical oil impregnated dimensionally stable paper.

AMF: Anti-Marking Film - Premium Quality Polyester backed Long Lasting.

AMF-A: Anti-Marking Film - Same as AMF with self-adhesive backing.

Anti Marking Jackets

The Master Red Anti-Marking Jacket is the latest development in Anti-Marking Systems for sheet fed printing. After the expensive chrome or refined jackets, the Master Red Anti-Marking Jacket is the most durable, effective and economical way to protect the transfer cylinder surface from build up and smearing of ink - an ideal solution for preventing unwanted marking during the printing process. Easy to install on transfer and delivery cylinders and completely replaces existing systems. Master Red Anti-Marking Jackets are available with different fittings depending on the age of your Heidelberg Press. These include clip-on for SM74 presses and loop fixing for SM102 presses. Loop fittings are made of oil and solvent resistant durable elastic with controlled stretch for quick and easy fitting and installation.

Press Room Supplies

Ink Repellant Nets

- Easy to use
- Less Marking
- Shorter make-ready times
- More production times
- Reduce paper waste
- Prevent ink build-up on transfer cylinders

Revive Blanket Repair

For repairing blanket damage.
Allows a print-run to be completed despite a smash!
Apply Revive! to the affected area using the brush applicator.

Packing: 250ml can / 6 x 250ml cans per box

Sponges

This 115x35mm compressed cellulose sponge swells to a handy 150x100mm. Highly durable it does not break down even after prolonged use with pressroom chemicals. Packing: 1 piece wrapped in cellophane

Magnifying Glasses

We carry a wide range of optical eye glasses, quality manufactured, value for money, other models available on request.

Press Room Supplies

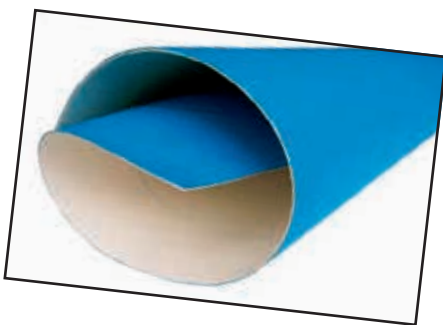

Ink Duct Foils & CPC Consumables

Maximum chemical, thermal and mechanical strength for long life without ink duct contamination. Only virgin resin suppliers are used - no recycled polyester. Tested using both conventional and UV inks. Permanently formed for secure and accurate fit. Compact.

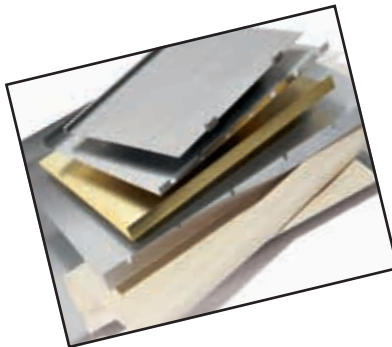

Wash Cloth Rolls

Our blanket wash cloth rolls are made only from the highest quality material. The cloth rolls are precision-made for exact fit and optimal cleaning performance. Mini Rolls Dry, Mini Rolls Wet and Jumbo Rolls are available for Heidelberg, KBA, Komori, Mitsubishi, Oliver Sakurai, Roland, Fuji-Shinohara, Toshiba Web.

Individually packed in protective sleeve
Moulded rubber tip chemically bonded - no breakdown

PRESS ROOM SUPPLIES

Ink Knives

Manufactured in one piece from durable polypropylene making them tough, flexible and solvent resistant. With rounded edges, there is no risk of damaging rubber, plastic or Teflon parts on the press. Very popular with press operators, the special blade angle and light weight make them easy to use. Supplied in sets of four knives in plain white carton boxes. The knife size is 270x70mm. Heavy duty wood handled stainless steel ink knives available in sizes from 45mm, 60mm, 75mm & 90mm .

Paper Wedges

Aluminium and Plastic Paper Wedges

The Aluminium wedges are precision cut to exact height and uniformly bent

Conveniently punched holes for easy handling

Rounded corners and edges to protect hands and fingers

Space saving - easy stacked and stored in a cabinet

Staples

RAPID - SKREBBA - NAGEL - MAX - GOLDLINE

Tapes

Cloth & Bookbinding tapes, Double sided tapes, Foam tapes, stationary tapes, packaging tapes, strapping tapes, masking tapes, gum paper tapes and speciality tapes.

Main features:

- Excellent running characteristics on hotmelt equipment
- Very good layflat characteristics
- Constant viscosity
- Better working conditions due to less odour
- Outstanding stability of adhesive bindings
- Advanced resistance to oil

PLANATOL®

PUR-like quality on Hotmelt Equipment

PUR or EVA? Planamelt combines PUR-like quality with the advantages of EVA adhesives in one system.

Planamelt is a new hotmelt technology, especially developed for the requirements of the graphic arts industry – and therefore the first choice for adhesive bindings and side gluing of any print products.

Stitching Wire

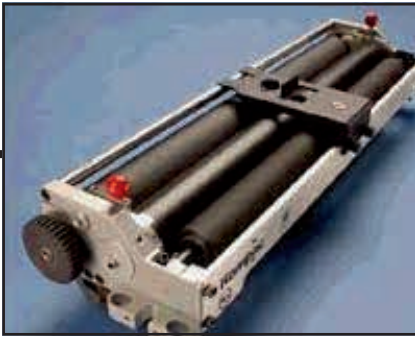

Miruna stitching wires were developed for high quality magazines, notebooks, books, notepads and catalogs. Miruna wires provide high production performance and avoid waste, representing a real benefit to your postpress line. It comes in diverse diameters and treatments to allow greater protection against oxidation, creative works, flexibility and durability. The diversity of spool sizes, the gauges accuracy and great finish allow continuous workruns from low to high speed, providing greater productivity and reduced downtime.

Finishing types: galvanized or polished.

Spool types: 2.20 kg 3.50 kg, 10.0 kg, 13.0 kg, 15.0 kg, 20.0 kg 30.0 kg, 50.0 kg and 100 kg. The spools are packed in cardboard boxes, ensuring greater protection in storage. Please, maintain the spool wire into the boxes until it's use.

Knives & Blades

Varn Kompac Spare Parts & accessories

We are an authorised agent for Varn Kompac dampening systems. We can provide all parts including seals and rollers etc.

Feeder Belts & Slow Down Belts

Using the best material available we supply all types

of belts elastomer, wear resistant polyurethane, woven, endless, self tracking, vacuum, with or without carcass, covered, sealed, fused and anti-static.

Suckers

Our rubber sucker range has been developed over decades, Produced to original manufacturers specifications our rubber

suckers cope easily with the demands of todays high speed printing presses.

Brush & Rubber Wheels

Using the best material available and state of the

art manufacturing equipment our team of professionals can assure you of a superb product. We supply all types of brush wheels and rubber wheels.

Separators & Feeder Brushes

A huge range of quality manufactured sheet separators and feeder brushes are available,

don't pay huge sums from the manufacturer, ask us for a quote.

Industrial Wipes

Tork Industrial Cleaning Cloths

High-performance wipes are vital in most industrial workplaces, both for hygiene and productivity. We support your staff with the right tool for the job.

Tork dispensing solutions for heavy-duty use support greater productivity, increased quality, improved cleanliness and better ergonomics. The Tork offer includes wipes and cloths for all types of use – from heavy oil spill to fine polishing.

The selected wipes need to withstand solvents and remove grease while being sufficiently bulky to provide hand protection against edges. Tork Premium 530 wipes are perfect for this task along with the floorstand (WI), where a high-capacity solution is required and where the dispenser can be located close to the task at hand for improved work flow.

Washroom Products

Choosing the right hygiene system for your washroom or wash station is easy. When assessing your needs, it is important to consider the type of washroom you are trying to create, whether you are looking for that 'wow factor', an everyday washroom or perhaps superior hygiene is critical. To help you, we have identified four different types of washrooms, each with specific characteristics and needs.

Hand Cleaning Wet Wipes

Convenient - Portable, robust containing all you need to clean hands on the go.

Increase efficiency - Clean hands quickly with thick, durable wipes that remove grease and dirt with ease.

Improve hygiene - Dermatologically tested Micro Emulsion formula is gentle on hands but tough on dirt.

Surface Cleaning Wet Wipes

Convenient - Portable, robust bucket containing all you need to help remove dirt, grease and grime on all types of surfaces

Increase efficiency - Clean up quickly with thick, durable wipes that are strong enough to be reused.

Improve hygiene - Remove the risks of storing mixing chemicals in your workplace.

AGS Citrus Hand Cleaner

AGS Citrus Hand Cleaner is developed for the care and cleaning of hands in heavy industrial and service operations. It contains natural volcanic pumice, an excellent mild abrasive.

It quickly and effectively removes all traces of oil, printing ink, grease, grime, paint, carbon and other soils. AGS Citrus Hand Cleaner incorporates natural citrus derived solvents.

Available in 4 ltr & 20 ltr

Powerful, Non toxic and Green Certified Hand Cleaner

WORX™ is a powder made entirely of Natural, Organic Ingredients which are biodegradable.

WORX™ hand cleaner is a true environmentally responsible product that removes industrial grit and grime from hands like magic! It is organic and all natural, biodegradable, and non toxic to humans and wildlife in all stages of its use. "Green" in every environment, it can be safely transported, stores, disposed of, waste-treated, and finally dispersed into streams and oceans.

WORX™ hand cleaner does not have solvents, phosphates, chemicals, alkali, or other toxic substances.

Natural formula - Gentle and Sensitive on Hands

Available in 184gm (184 washes) - 454gm (454 washes) - 2040gm (2040 washes)
